

## DW-E Series Universal Power Supply

DW-E series universal power supply include 10 models, the maximum output voltage varies from 200V to 10000V, can widely cover most electrophoresis experiments, DRAWELL can provide different types of power supplies for experiments with different uses.

DW-E series universal power supply is based on the DW-C series universal power supply on the optimization of control program, expansion the product function, which simplifies the operation, and greatly improve the performance of the electrophoresis power supply.

Stackable  
Chassis Design

Low noise,  
Strong radiator  
Fan

Embedded  
Power Jacks

### Features

1. Molding shell, touch keys, dual core microprocessor intelligent control.
2. 0-9 digital button, easy and convenient to operate.
3. Indicate the preset value and the actual output value at the same time.
4. Can store 100 electrophoresis methods.
5. Automatic memory function.
6. Step-by-step control function (editable 10 groups, each group of up to make 10 program automatic connection operation).
7. Pause control function (including real-time tuning)
8. Standard, timing, V-hr, step-by-step operation function.
9. Constant voltage, constant current, constant power, misoperation, fault and other warning functions.
